1. Receiving the Report of the Directors on the business of the Society for the past year.

2. Electing two Directors in lieu of Boulton Molineaux, Eq., and John Fairfax, Eq., who retire in terms of By-law 11, both of whom are eligible for re-election.

3. Electing an Auditor in lieu of Henry Phillips, Eq., who retires in terms of By-law XVII.

In terms of By-law XXXIX., No member shall be put in nomination for the office of Director unless "written notice thereof, or of his being a candidate, shall have been given to the Board, or to the Secretary, at least thirty clear days before such meeting."

Dated at Sydney this 14th day of March, 1872.

By order of the Board,

General Secretary.

TO THE MEMBERS OF THE AUSTRALIAN MUTUAL PROVIDENT SOCIETY.

LADIES AND GENTLEMEN,—I am one of the Directors retiring by rotation at the next annual meeting, on the 34th proxime, but an eligible for re-election. It was my privings and honour to be one of the first Directors, and I have been a member of the Board during a large portion of the Society's existence. I shall not canvass for votes or ask for proxies. Such a practice I believe to be underlimble in an institution is volving the interests of many thousands of members, and the investment of more than one million of money.

HERALD Office, March 16, 1872

TO THE MEMBERS OF THE AUSTRALIAN MUTUAL PROVIDENT SOCIETY.

LADIES AND GENTLEMEN,—I have the honour to inform you that I am a CANDIDATE for the office of Director of our Sockity, to be elected at the next ensuing Annual Meeting.

It is neither my intention to importune you by any personal canvass nor to trouble you by soliciting your votes through the medium of an agent, because I doem it better for our mutual interest that you should be quite free to make your own choice.

The fact of my being one of the largest policy-holders, and that I formerly filled the office of Director for a period of four years (during which time I assisted in efforting some very beneficial changes in the management), will, I trust, be considered by you as sufficient guarantes that, if elected, my best energies will be devoted to the success of a Society in which, in common with you all, I am so deeply interested.

S. A. JOSEPH.

4, O'Connell-street, 14th March, 1872. TO THE MEMBERS OF THE AUSTRALIAN MUTUAL PROVIDENT SOCIETY.

LADIES AND GENTLEMEN,—I beg to amounce myself as a candidate for the vacant seat in the directorate of our Institution, to be filled up on the 24th of April next.
For the information of members at a distance, I may state that I was a member of the "Investigation Committee." whose concerns duties extended once members are the statements. state that I was a member of the "Investigation Committee," whose concross duties extended over many months,
and subsequently a director for three years until my departure for England, during which period, many important
alterations were effected in the management of the society,
which gave me an unusual apportunity of gaining an
misight into its affairs.

Boliciting your support and votes, I beg to call the
attention of those members who cannot attend the annual
meeting, to the forty-fourth by-law, which requires all
voting papers to be written out by members, with their
own hands, and worded according to annexed form.

Your obedient servant,
JOHN H. GOODLET.

I vote for to fill the office of Director of the Australian Mutual Provident Society.

Dated this day of 1872.

TO THE MEMBERS OF THE AUSTRALIAN MUTUAL PROVIDENT SOCIETY. LADIES AND GENERAL, I repeatfully beg to an-nounce myself as a CANDIDATE for the office of Auditor at the next Annual General Meeting, to be held on the 24th April.

PROSPECTU SURFACE HILL GOLD MINING COMPANY (Limited), Wattle Flat.

Capital, £5000, in 10,000 shares of 10s each, half of which and £300 cash, are reserved to the proprietors to reimburse them for their property and outlay, 2s 6d per share to be paid on application, 2s 6d on aliotment, and the balance in calls not exceeding 1s per share per month.

the balance in calls not exceeding 1s per share per month.

This Company is formed for the purpose of working a 10-acre lease, held by the proprietors—I. Grace and party—situated as the celebrated SURFACE HILL, Wattle Flat, near Sofala.

A considerable amount of work has been done, and a large quantity of stone raised, all showing gold. There is a tunnel running into the hill 73 feet, where the reef shows from 3 to 4 feet wide, and stone taken from it has averaged from 2 to 3 cs. of gold to the ton.

The only reason for offering this valuable property to the public is the inability of the proprietors to purchase suitable crushing machinery for themselves.

Immediately after the erection of machinery it is confidently anticipated that a large dividend will be declared from the first crushing.

The proprietors would direct attention to the fact, that this is no apeculation, but a certainty, being on a well defined reef 3 to 4 feet wide, thickly impregnated with gold.

The shares held by the public, without reference to the amount paid up, will participate equally in the division of profits with the fully paid up shares of the original proprietors. Application for shares to be made to C. BATE and CO., Brokers, 165, Pitt-street, Sydney, where specimens may be seen, and from whom prospectuses and all information may be obtained.

CAPITAL, £8000, in 8000 Shares of £1 each, 4000 of which are reserved for the proprietors and 4000 are offered to the public at 10s paid up; 1s to be paid on appli-cation, le on allotment, and the balance, if required, in calls not exceeding 1s per month.

PROVISIONAL DIRECTORS: John Sutherland, Eeq., M.L.A. Sydney, Alderman Woods, Sydney, Thomas B. Harwood, Req., Ultimo, Sydney.

BANKERS: Australian Joint Stock Bank, Sydney.

William Teale, Esq., King-street.

William Teale, Esq., King-street.

This Company is formed to work a Lease of Pive (5)
Acres, held by the proprietors on the famous Robinson
Crusce Line of Reef, being No. 4 South. The adjoining
claims are on good payable gold, and surface stone from
the "Robinson Crusco" claim averaged over two ounces to
the ton. Good Surface Stone has also been obtained from the
whole Line of Reef equal to that crushed from the
Robinson Crusce claim.
A crushing machine is now being erected near Bragg's
Hotel, on the Turon, within half a mile of the ground of
the precent lease. Another crushing machine of twenty
head of stampers is also in course of erection immediately
below the Robinson Crusce Line of Reef.
The well-known Characters and RICHNESS of this

below the Robinson Crusoe Line of Reef.

The well-known Chalacten and RICHNESS of this celebrated Line of Reef is a sufficient guarantee that large and quick returns may with confidence be anticipated. It is fully believed that not more than half the 10s will be called up before the Company is dividend paying, whom all shares will rank equally.

Applications for shares to be made to C. BATE and CO., Brokers, 165, First-street, Sydney, from whom Prospectuses and every information can be obtained.

CAPITAL, £5000, in 5000 SHARES of £1 EACH, 2000 of which are reserved as fully paid Shares for the present Proprietors. The remaining 3000 are offered to the public on the following terms:—
60 Promoters' Shares of £5 each, which will entitle each Promoter to 50 Shares, twenty of which as fully paid up to £1, and thirty as Contributing Shares subject to Calls of one shilling per share per month.

The ground belonging to the present Proprietors is situated on the northern bank of the Turon River, bounded on the east by the Rise and Shine, on the west by the Confidence, on the north by the Champion Line; it is within 300 yards of Lowis Machine, and is easily worked by a tunnel from the river side. These facilities for working enhances the value of this property, which consists of four acres.

working enhances the varue or this property, which consists of four acres.

There are four distinct veins run through this ground, all carrying gold.

In connection with this Lease, the Proprietors have secured a splendid mechine site, which will be handed over to the Company on its formation.

Directors will be elected from the Shareholders as soon as the Company is formed. Early application is necessary, as there are only a few shares remaining.

Full particulars may be obtained from G. T. SUTTON, at A. W. Sutton's, 254, George-street.

"Sir,—In accordance with your instructions, I have the honour to inform you that I have visited, surveyed, and generally examined the Lasy Isabel claim, and now bog to turnish you with the following remark descriptive thereof:
—This claim is seven acres in extent, is situated upon Hawkins Hill, partly north of the southern boundary of the Hill End township, and bounded as follows:—on the north by the Locomotive gold mining lease area and township allotments of Hill End; on the south by the main lead and Coyle and Co.'s lease; upon the east, at a short distance away, by the Prince of Wales claim; and upon the west partly by the Locomotive, Sons of Freedom, and the private property of Mr. Wm. Holman.

"Upon looking at the socompanying map it will be seen that I have shown some old worked alluvial ground, where rich gold deposits were obtained, the gold being generally of an angular unworn character, and thickly impregnated with quart; chromstances strongly indicative of the close proximity of the lode from whence it came. It is now a month or six weeks since the Lady lashel, Main Lead, and Coyle and Co.'s lease were taken up, and since that time men have been employed upon them respecifyely, as directed by the Gold Fields' Act. In the Main Lead, and Coyle leases, fine lodes have been discovered, two in the former, and one in the latter; those in the former, and one in the latter; those in the former running about ten dagrees west of north, and dip to the eastward at the high angle of seventy live dagrees, thus being most favourable as regards their position in the Lady Isabel's claim. This Company is formed for the purpose of purchasing and working the well-known Foller's Reef and other quartz reefs on the Denison Gold-fields, which have been profitably worked for some years past; together with the present plant, buildings, machinery, and freshold and leasehold lands belonging to the proprietors, say about forly-five acros, as detailed in the accompanying schedulo. The report and plan annexed will show that an immense amount of work has already been done towards laying out the mine for delivery of large quantities of stone, and the results already obtained show that it is likely to be second to none of its Find in New South Wales in its dividend-paying prospects.

There is a splendid water-power on the property, and the whole of the crushing machinery will be driven by it.

A large water-wheel is being erected, and a contract has been entered into with Messes. P. N. Russell and Co. for a battery of ten stampers, which it is expected will be erected and at work within three months, at a cost of about £1000. The terms proposed are that the proprietors shall have 15,000 shares of £1 each allotted to them, at 10s per share paid up, together with the sum of £2500 cash for the property as per schedule, and that the subscribers' shares shall be called up to 10s each. The shares will thus all be on an equal footing, and will all participate equally in dividends, and on the other hand will be liable affect to future calls, if needed. The amount of capital (£7500) to be called up, in terms of this prospectus, will be devoted to payment for the machinery aw in course of erection, and the payment of the purchase money to the preprietors, and will it is believed be ample forful purposes. There are over 100 tons of stone at grass, and by the time the machinery is erected, there will be fully 300 tons ready for crushing, which Mr. Saunders is of opinion will go from 2 to 3 or, to the ton, and which will be available for paying dividends.

The proprietors will pay all the costs of floating the Company.

Applications, addressed to Mr. J. MULLENS, Sharebreker, 131, Pitt-street, must be accompanied by a deposit of 2 of der share, and a turther sum of 2 of dwill be rayable on allotment, and the remaining call of 5s, making its in all, in three months.

Levica and Saunders's Claims, Moonan Breok, Denison Diggings, New South Wales.

"Bydaey, 4th September, 1871.

"During last week i duly examined the two 10 acres lessed gold mining lands belonging to the above firm. These are situated about two miles from the township of Moonan, in a mountainous district, that offers great facilities for the economical extraction of the auriforous quarts by means of adits driven on the course of the well-known Fuller's Reef, which has been proved to traverse the whole length of these claims.

"South Lesse.—The permanent works recently opened in this acciding consist of an adit driven mortherly on the course of Fuller's Reef, about 440 feet in length, and attributes at the extreme end a depth of about 250 feet, and driven underneath the old workings which proved highly payable. The reef is exposed to view throughout the length of the extreme adit, but in its outer portions the old works have nearly approached to that horizon, whilst from this to the end of adit the reef exposed for stoping attains a height of the end of adit the reef exposed for stoping, and will afford a large quantity for the stamper mill. The reef varies in size from 6 to 30 inches, and in the end of drive is near 24 inches wide, with gold visible therein.

"Block Claim of 150 feet long.—This belanged to Mesers Warren and others. It separates the two leased claims previously referred to: it would, therefore, be desirable to acquire this ground by purchase in order to remove all obstacles in develoging the whole property, especially as it is requisite to extend the adit through this block into the second 10-acre claim. Fuller's Reef traverses through the 160 feet claim, and a crushing of twenty-one tons of stone taken out of it was cleaned up during my visit, which yielded five nunnes of gold per ton of stone, the reef averaging about 10 inches

Mr. JOSIAH MULLENS, 131, Pill-atroct.

The property which it is proposed to work under the above title is a twenty-acre lease, situated on Johnstan's Hill, Kimo Ranges, about ten miles from Gundagai.

An immense reef of congiomerate quarts and anadatons, with slate casing, and well-defined grantic walls, runs through the entire length of the property (640 yards).

The width of the reef is from twenty-sight dest at inchase to four feen feet. Two shafts have been sunk on the rest, one of twenty-sight edd deep at the morth end, proving the reef to be twenty-sight if est six inches wide: and the other at the south is thirty-seven feet deep, showing the reef four-teen feet wide, (distance between the two shafts five hundred yards.) the stone showing gold throughout. The crushings taken from these shafts varied from eight and a-haft dws. to 1 on. The last lot crushed (40 tone) went 12 dwia, to the ton; but as the only machine is throw miles distant, and of no great power, the property to the public in order to rake a proper crushing plant of from fifteen to twenty head of samplers on the ground.

To this end application has been made for a maching site, on a creek about a quarter of a mile from the reef, with a good road on a descending gradient. This site is admirably adapted for the construction of a dam at moderate cost.

It is estimated that about £5000 will be ample for purchase.

reef, which, on account of its great extent and facilities for working, can be quarried at a cost of less than four shiflings per for.

The present indications lead the proprietors to believe that the supply of stone is almost without limit, and gold-bearing throughout.

In the event of the Company being formed, it is possible that the services of Mr. William Woolnough, who has been for many years resident in the neighbourhood, and has a large experience in quarts-crucking, may be obtained for the local mangetment.

Mesers. Henry Woolnough (Wynyard-sireet) and E. E. Smith (Struth's Wharf) have visited the mine within the last few days, and (as far as non-professional opisions are worth anything) are able to state that the account as above given in perfectly correct, and they firstly believe, from information obtained by them from practical miners on the spot, that eleven shillings per toon expenses will produce eight and a half pennyweights of gold per ton.

Terms are as follows:—The proprietors ask £500 in cash, and fire thousand shares paid-up; the cashwill give a right to the stone (say about fairty or seventy tons), tools, sheds, &c., now on the ground.

No more caspital will be called up than will be sufficient to work the quarry of stone on the ground, and ALL SHARRS WILL PARTICIPATE RQUALLY IN DIVIDENDS, WHATSONYME THE AMOUNT PAID UP MAY BE.

The Company will be registered under "The Limited Liabilities Act." As soon as formed, a meeting of the shareholders will be called to elect directors and approve of articles of association.

The expenses of docting the Company will be paid by the proprietors, and the share list will be closed as soon as afficient shares are applied for.

This Company is formed for the purpose of erecting quarts crushing machinery and working TEN ACKES on the line of reels known as the General Bourke and Naggesty Reefs at Chambers' Creek, which are the southern continuation of the well-known Hawkins Hill Belt. The ground is close to Mesers. Allen, Hunt, Houseman, Schraeder, and Pigott's well-known claims, all of which are now getting gold and are in full operation.

The auriferous reefs crop out on the surface through the entire length of the two claims, which consist of 4 acres on the General Bourke Reef, and 5 acres on the Nuggetty Reef. For the machine site the proprietors have secured the acre, acknowledged to be the best position in the district, with a never-failing supply of water at all times. The quartz from the Company's claims can be delivered at the battery by a self-acting transway.

The machine site, which can be seen on the map at our office, is surrounded by numerous very rich claims, now in full work, and the profits from crushing for the public would sless prove a most renumerative investment.

The high value of the Chambers' Creek leases is scarcely yet known in Sydney, but all who have inspected the ground have returned convinced that the district is beyond doubt one of the richest yet discovered. Mr. Housman has just sold one acre, (the Bismark Lease) for £3500 (cash, AND WHICH HAS 1927 HIEN RE-SOLD IN STIPNSY FOR £5000. But little need be said to recommend the re-modelled "MONITOR GOLD MINING COMPANY" to the notice of the public, as it will be at once seen from the foregoing stranks that nothing has been admitted in its constitution that would retard its success.

The claim is well known as Verk's New Lease of 4 terre, Hawkins Hill, Tan, reors, and is immediately bounded on the north by Rapp and Renetesu's well known leafor.

bounded on the north by Rapp and Renetesu's well known chain.

It may be confidently assumed that this area of ground embraces within its boundaries some of the most amiferous constant that un through Hawkin's Hill. Amongst others may be mentioned Rowley's vein, the richest ever opened in the district, and which, when worked some twolve years ago in the absence of mechinery, realized enormous returns to the shareholders.

The working of the claim is steadily progressing, and will te under the personal superintendence of the proprietor, who from careful computation made respecting the position of ROWLEN's, and other gold-bearing veins in the surreunding claims, expects to strike rich gold at a depth of 150 feet.

It may be asserted with confidence, that no property has yet been offered to the public more suggestive of a profitale return for invostment.

This ground possesses the additional advantage of having its antern boundary throughly tested by the drives now in progress by VICKERY and Co. and Nichon and Co.'s Long Drive.

A plan of lease can be seen at Brokers, where forms of

Applications for shares, enclosing the required deposit will be received by H. W. FOSTER and CO., Graville's chambers, 2nd floor, and printed receipts will be given.

SIR HERCULES GOLD MINING COMPANY
(Limited)
On the HAWKINS HILL LINE OF REEF,
TURON RIVER.

Capital, £8000, in 8000 shares of £1 each, of which 4500 are offered to the public.

Dividend will be declared equally on all sharer.

Dividend will be declared equally on all shares.

This Company is to be formed upon the cost book principle, viz.—Shareholders may retire without further liability than their amount paid in. The terms are most literal: 2s per share on application, 2s on allotment, and calls not exceeding is per month. It is expected that not more than 10s per share will be called for, as no machinery, other than the lifting gar, will be required, there being a powerful crushing machine within 300 yards of the claim. By tranching, two rich veins have been ut over a feet wide, and good payable stone has been already raised. 3 There is every prospect of the "Sir Hercules" becoming one of the richest claims in the neighbourhood, which its position warrants, being bounded on the north by the very rich "Homeward Bound" claim, and on the south by the same hine of red as Messrs. Holtermann's and Co. a llawkins Hill View, and other heavy gold bearing claims.

A plan of the ground can be seen, and prospectuses, and all information obtained at the office of the Brokers, Application for shares can be made to either of the Provisional Directors: or to H. W. FOSTER and CO., Brokers, Greville's Chambers, second floor.

MARYLAND RUBY TIN MINING COMPANY (Limited).

SHAREHOLDEES are informed that SCRIP is now ready for issue, and may be obtained at the temporary effices of the Company, 62, Margaret-street, upon payment of allotment money, and execution of the Deed of Settlement,

J. WINDRED has received instructions from Mr. J. Irvins to dispose by private contract of the whole of his VALUABLE FREEHOLD PROPERTY, being as

VALUABLE FREEHOLD PROPERTY, being as follows:—

A FARM of 409 acros (more or less), of the finest class agricultural and grating land, with permanent supply of water. The property is bounded on two sides by stony creeks of clear water. The general aspect of the land is undulating, sloping towards the creeks. The farm is divided into paddocks, mostly cleared, and the remainder being bush paddocks lightly timbered. The grass is the paddocks cannot be equalled, whilst the character of the fists and grassy ridges gives fair indications of gold deposits.

The IWELLING-HOUSE, 24 x 36 feet, built of brick, and shingled, with verandah and cellar, contains parlour, dinimp-room and bedrooms. In addition, there is a detached kitchen, 22 x 14; dairy; wheat shed, 60 x 20; five-stall stable, built of alabs, and bark-roofed; stockyard and pens, strongly built; coachhouse, piggeries, fowthouse, and other outbuildings substantially etceted.

rected.

The GARDEN, of 1½ acre, is paled, and contains every description of grown fruit trees and vines, all bearing. In the garden is an excellent well, bricked, with windless.

windiase.

The PADDOCKS consist of two, containing two acres each, under cultivation; one of 16 scree, ditto; one of 59 acres, bush land, one of 109 acres, ditto, uncleared. These peddocks are south of a Government road, and include the dwelling-house. All are subdivided and substantially feaced.

On the north of the Government road are one 23-acre peddock, under cultivation; one 18-acre ditto, running to a creek; one 28 acres, under cultivation; and one 120 acres bush land, bounded by creek and Government road; all subdivided with superior fencing.

The Heifer Station Farm is situated about 5 miles from Orange on the main road to Forbes, being a metalled road all the way.

The terms are half cash, and the residue by approved bills. For further particulars apply to the auctioneer. In submitting the above freehold the Auctioneer, from its well-known capabilities, feels assured little need be said to recommend it to the notice of purchasers. The farm is in the highest state of cultivation, and ready for occupancy without any further outlay than the purchase. It might be mentioned that all the fencing is most substantial and is all three-rail.

Music.—The pretty song, "Put me in my little bed," by Mr. White, has been published in a very cheap form by Mr. J. R. Clarke, music-seller, of Hunter-street. The air is very melodious, and when sung by a child is really charming.

AMERICAN EXCELSIOR MINSTRELS.—This com AMERICAN EXCELSION MINERALS.—Ims company of minestrels gave an entertainment in the School of Aris last evening. The audience was rather limited. The programme was a varied one, and it was readered with ovident acceptance. Comic and sentimental songs formed the principal feature of the concert, and in several instance they were encored. The songs were agreeably intersporsed with conficilities. "The Great Pedestal Dance," by T. Hudgen, was warmly appleaded. An amusing farce closed the programme. Another performance, with a change of programme, is announced for this evening.

programme, is announced for this evening.

BESPEAR PERFORMANCE TO MS. DARRELL.—
The proposed departure of Mrs. George Darrell from Sydney has auggested to many admirors of that talanted lady the propriety of elving her a complimentary parformance before the leaves. It is to take the form of a "bespeak," and a number of gentlemen have formed themselves into a committee to carry out all necessary arrangements. The performance will take place on Wednesday next, at the Victoric Theatre, when the commety of "Money" will be played, followed by a miscellaneous entertainment.

THE AMERICAN CIRCIN.—Last aventure a com-

THE AMERICAN CIRCUS, —Last evening, a complimentary benefit was given to Mr. T. King, the energetic manager of the circus. There was a crowded attendance, and the performance passed of very successfully. A number of valuable prizes were offered to the public, and the distribution took place on the lottery eyetem, visitors receiving numbered tickets as they entered the various doors. There was a special entertainment for the conscious, and the efforts of the company received due recognition.

Miss Greeti, applied Nr. Joe Chambers, danced a sailor's bornpips, and received an encore. Mr. Flexmore, aclows, was as humourous as usual.

SATURDAY, MARCH 16, 1872

A TRIAL of importance has taken place in of the British Crown was arraigned for the assault and false imprisonment of two natives. The particulars of the assault have already appeared. These unfortunate persons were violently detained on board a ship, and, being there, were afterwards supposed to have been the cause of the murder of two persons who guarded them. The trial was important, as at least giving one proof of good faith on the part of the Fijian Government in endeavouring to prevent the oppression of the natives. But it is of more consequence as a formal assertion of jurisdiction in a Court constituted under the authority of the Fijian monarchy to try and punish for crimes committed by foreigners,

even though British subjects.

Of course the whole question goes into the autonomy of the Government of Fiji; its right to independent action in all cases concerning the public welfare; its consequent responsibility for the mode in which that action is carried out to the nations whose subjects are concerned; in short, the question is whether the sovereignty of the King of Fisi is to be received as valid, according to international law; and then whether the subjects of her MAJESTY are allowed to take office under the King, and are protected in so doing from any responsibility to their own Government while resident, except through him. When England refused the sovereignty of

the Fijis distinctly and finally, it must have been obvious to every man that one of two things must happen—either that the thousands of persons residing in the group must be brought under the dominion of local law, or these settlements must be abo When, therefore, the Government of Fiji was constituted, and the forms of Bridsh law were, as far as possible, adopted, we did not think ourselves called upon to look very closely into the antecedents of those who were active in this movement. We do not know that Eaglish

For fetalled advertisements see Herald of the 1tth and the content of the content of the content of the colonists have no such this point is somewhat dangerous. The friend would oblige his friend, and undertake to do his last wishes with respect to his family or his property without fear of failing either in consuct, not as British to answerable for their conduct, not as British subjects, but as having the protection and being liable to the responsibilities of international law. To constitute a Government, or to give it a title to act, it is not necessary that it should be formally recognized by other it should be formally recognized by other nations. This must be a question of form and nations. In is must be a question of form and time, and it is perfectly clear that the Government cannot be recognized until it exists; and, therefore, that the form which it may take must be adopted before it can claim that recognition. After the fall of Leuis Naroleon, there was no Government in France recognized by foreign anticar. in France recognized by foreign nations.

There was a friendly intercourse, but not an official recognition. But the moment any steps had been taken which satisfied England. steps had been taken which satisfied England, for example, that a Government did exist, the Ministers at once recognized its right to act for the French nation. Applying this rule to the King of Fifi, the English Government may hesitate to admit his subjects into the family of nations, and to hold diplomatic relations with him. It may require months, it may be years, before all preliminaries are arranged by which this recognition is declared. It is not to be inferred because there is no It is not to be inferred, because there is no It is not to be inferred, because there is no diplomatic connection with the King of Fifthal that his Government will be treated as a nonentity. An English Ministry, when told that the Fijian Monarch ought not to be recognized, that he is not a king at all, will ask where the Government of Fiji is? If there was Civil war, if chiefs of equal authority had protested against Thakompau's sovereignty, or if he had been unable to maintain the internal action of his Government, if taxes had not been paid, and municipal laws received, then a doubt might have existed whether the Fijian Government was a myth or not. But it never can be alleged was a myth or not. But it never can be alleged was a myth or not. But it never can be alleged that it is deficient in any of those attributes which constitute a governing body, or that it is incapable, by its head, of holding intercourse with foreign nations. This ought to be distictly understood by those who are disposed to treat with derision and contempt the Government of Fiji: that it exists alone, that it is the only authority carable of giving law. the only authority capable of giving law, or carrying out administration, and that, as far as we have heard, it has done so in the spirit of international justice, and entitled itself, if not to diplomatic relations, yet to friendly intercourse. Such being the case, Courts constituted by such an authority are undoubtedly valid; and that they are carried

undoubtedly valid; and that they are carried forward by the agency of Englishmen, under English forms, is no objection to them. Whether the recent legislation of Englishmen to the new conditions imposed by a more recent pelicy, we are not informed; but certainly they never would be enforced against the proceedings of a Contection in the same of a force testing in the same of the same of the content of the co of a Court acting in the name of an independent Sovereign. We attach no value whatever ent Sovereign. We attach no value whatever to the old prejudices against men of colour. They were long ago set aside by England, and even America. The Hawaiian monarchy has been long established, and is now much older than several of the dynasties of Europe. We fear that there are persons

in Fiji, who thoughtlessly reject authority from personal distrust of those who wield it. If, however, there is in the Constitution of Fiji the means of self-purification, a little ex-perience and parience together will enable the inhabitants to correct all anomalies, especially of a new system. Government is a permanent institution, and its agents are ephemeral. When we consider the great difficulties that have attended the establishment of govern-ment in New Zealand, the colonists of Fiji

will have reason for thankfulness if they are able to unite the suffrages of the natives with these of the civilized inhabitants. The King is a tower of strength so long as he is able to command the confidence of his own race; and command the confidence of his own race; and the concurrence of an enlightened body of settlers will greatly support him in intro-ducing the British jurisprudence. If, however, the colonists instead of seeking reforms in the Government which already exists, and re-moving from 11 any persons unfit to carry it on, encourage a spirit of disaffection and distrust and othershow the King there will find them. and other throw the King, they will find them-selves exposed to dangers of a more serious nature, and will postpone the acknowledg-ment of the Fijian sovereignty by the British Crown. A private letter from a gentleman of

British subjects not to become volunteers British subjects not to become volunteers under Tharkambau. If he believed that this was the import of the Foreign Enlistment Act, no doubt he was bound to give this notice. It is not to be forgotten, however, that the Emperor Napoleon was a special constable in London in 1848; and the assistance of any Government to preserve public order is very different from organizing a force to invade a friendly nation. By this warning the Consul recognizes the existence of THAROMBAU as a sovereign chief, with whom service might be taken on the allowance of the

THE Ballad " of the Babes in the Wood " informs us of the punishment of an uncle who undertook a trust on behalf of the children o his dving relations, and proved miserably faithless to it. Since that day, although myriads of such trusts have been reposed by the dying and such trusts have been reposed by the dying and undertaken by the living, comparatively few instances of an abuse of confidence have occurred. Now and then, it is true, we hear of instances in which breaches of faith have been made. Those who are acquainted with the history of England will have no difficulty in recalling some and others will recar to those recalling some, and others will recur to those who are familiar with modern criminal canses The number of the faithless might have been much greater, however, had trustees and executors been left to their own devices. The testator lays down certain rules for their quidance, and officers are appointed to see that these rules are observed. Therefore, although a testator may be wickedly disposed, it is somewhat difficult for him to abuse his trust, for the purpose of enriching himself, or any others, save the persons mentioned in the will. So careful has society been of the interests of the objects of trusts that trustees have been rendered responsible for negligence when, incretore, the Government of Fiji was constituted, and the forms of British law were, as far as possible, adopted, we did not think ourselves called upon to look very closely into the antecedents of those who were active in this movement. We do not know that Englishmen have a right to challenge a native Covernment because its agents are not the necessities of their own business obliged.

Nesitate, and very naturally so.

Vice-Chancellor Mallins has propounded a view of the responsibility incurred by trustees and executors which will very much alarm those who have already pledged themselves to the duty, and will prevent those who have thought of undertaking the charge from doing so. He seems to lay it down, that a trustee is responsible for errors of judgment; it may be also, by a slight amplification of the view, that he shall be responsible for any want of business capacity that may attach to him, so that, apart from motive, if he do but err in his view of what is for the good of the estate, so as to cause any transaction to miscarry or to yield less than it should otherwise do, he is bound to make good the loss. The case we refer to is that of Scuthorpe versus Tipper. The question in the suit was whether the trustees of Mr. John Palmer were liable to make good a loss of £1900 incurred in rustees of Mr. John Palmer were liable to make good a loss of £1900 incurred in respect of certain shares in the Birmingham Banking Company, which they held as part of the trust funds at the time of its failure. Mr. Palmer made a will in August, 1852, by which he gave all his property to four friends, the fourth being then, and up to September, 1865, a minor, as trustees upon trust to sell "immediately after his decease, or as soon thereafter as the trustees might or as soon thereafter as the trustees might see fit to do, as te the said trustees should seem proper;" and he proceeded to give instructions how the proceeds were to be invested, and the income of the investment divided. The testator died in April, 1864. Soon after his death it became necessary for the trustees to determine what should be done with the bank shares. They were directed to sell them at once, "or as soon after as they should see fit." They leoked at the matter in the interest of the estate. The bank was of unlimited liability, but it was an old-established company, was considered perfectly safe by all the persons interested in the will, and the testator, up to the time of his death, continued to maintain that the money invested in the bank shares was the best invested money he had. The VICE-CHANCELLOR himself could not but sons interested would have retained the share themselves, and would have been very angry with the trustees if they had sold them." It was not surprising that they determined upon hold-ing the shares for a time. Not long after this, ing the shares for a time. Not long after this, the Banking Company issued new shares, offering them to the original shareholders at par. Nine of these were offered to the trustees in respect of the thirty-seven shares belonging to the teatator's estate, and as there was nothing unusual in this transaction to excite suspicion, seeing that the preference shares immediately attained a premium, they purchased the nine shares offered to them out of the trust fund for £270. At this time the bank was paying a dividend of 10 per cent. the trust fund for £270. At this time the bank was paying a dividend of 10 per cent. on the capital subscribed. Within nine months after this time, and nearly two and a half years after the testator's death, the Banking Com-

pany failed, and was wound up in Chancery. The bank, as we have already said, was an un-limited company, and the calls upon the forty-six *hares amounted to £1900. Two of the infant granddaughters of the testator who took an interest under his will, by their father as next friend, filed a bill against the trustees to compel them to make good the loss which had been incurred in respect of the shares, contending that under the words of the will the trustees were bound to have ald the will the trustees were bound to have sold the old shares within a year after the testator's death, and had no power to invest in new shares. It is important to observe that the bank stopped payment in June, 1866, just nine months after the fourth trustee came of age and began to act in the trusts of the will. It was sharply contested that the trustees

It was snarply contested that the trustees were liable in respect of the new shares which they had taken without any authority in the will enabling them to do so; but it was argued on their behalf that, in retaining the thirty-seven shares held by the testator unsold, they had done no more than exercise the discretion expressly reposed in them, and that they were therefore accounted feet and that they were, therefore, exonerated from any liability on account of them. The Vice-Charcellor, however, did not coincide with this defence. He allowed the bank to be a well-established bank, the shares to be a good in-Crown. A private letter from a gentleman of considerable influence but unconnected with the Government, sustains this view, and expresses deep regret that the Consul of England should assume an attitude of hostility not at all necessary for the duties of his position.

A notice appears in the Fiji Gazette, signed by Mr. Marsh, the British Consul, warning British subjects not to become volunteers believed the bank to be a well-season good investment, and the trustees to be acting not for their own personal benefit, but altogether for what they considered the interests of the chaip, Murphy, J. B. Roldsworth, T. E. Neale, Booth, Healet, S. Goodf, Esphael, Jones, at the place in the persons for whom they were trustees. He allowed that these persons would have pursued the same course if they had been left to them. selves and would have blamed the trustees had they either sold the old shares or refused to they either sold the old shares or refused to take the new. He allowed that the testator himself would have been perfectly satisfied with what his friends had done. Notwith-standing this admission, he found himself "compelled to hold them liable to replace this sum." There could be no doubt, he this sum." There could be no doubt, he said, that the power of investment did not authorise the purchase of shares in such a company, which was of a kind exposing the shareholders to unknown casualties by remaining interested in it. The VICE-CHANCELLOR thought that if the words of the will relative to the selling of the shares at some convenient time the shares at some convenient time after the testator's death were grammatically construed, they must be understood to mean no more than that they were not bound to sell them immediately at any cost, reasonable time being allowed them—a period generally defined by the Court of Chancery to mean one year. Now the trustees had held the shares for two years and two months, and were therefore pro-nounced liable for all the loss. His words were s follows :- " In this case the trustees, with the best intentions, no doubt, have retained an existing investment in shares in an unlimited company for two and a half years after the testator's death, it being in their power to have sold them to advantage within a year. I think, therefore, to have so sold them would have been their duty, and that they bave not done so, they must be held liable to replace the loss in respect of the thirty-seven old shares, which they retained, as well as the loss in respect of the thirty-seven old shares, which they retained, as well as the loss in respect of the nine new shares, which they purchased." As to the fourth trustee, his plea of non-complicity was disallowed on the ground, that although he had only come of age nine months before the bank's failure, he had in that time adopted the acts of his co-trustees, and must share est intentions, no doubt, have retained an

the acts of his co-trustees, and must share their liability. This seems a rather arbitrary decision on the part of the Judge. The decision on the part of the Judge. words in the will might well considered to shield the friends of

to be doing the best for the estate, from being so severely visited. He could not have done more had the law prescribed the period of twelve months, from the death of the testator for the realising of his effects; but as it is, he seems to ground a somewhat unreasonable, not to say an oppressive decisien, upon a custom of the Court of Chancery, which has better claim to existence than the convenience of all Court of Chancery, which has better claim to existence than the convenience of all concerned. It is well to preserve executors from growing lax in the discharge of duties towards friends who no longer remain to look after their own interests; but such a decision as this will compel mea to forego the offices of friendship, the risks of the executor being incompatible with the secutor being the secutor bein the executor being incompatible with the con-sideration due to their own interests and these

It appears that this point was long ago considered by an eminent lawyer. A case was brought before Lord COTTENHAM, in which an brought before Lord COTTENHAM, in which an executor who was ordered "to convert with all convenient speed, and to pay legacies within four months," held some Mexican bonds on for some nineteen months. He was sued for for some nineteen months. He was sued for loss which occurred in consequence, and the following is the opinion pronounced by his Lordship:—"The executor has exercised his best discretion, and if he has erred it was an error in the judgment he formed with respect to the executive of leaving the property in the the propriety of leaving the property in that state of investment in which he received it state or investment in which he received it from the testator. I can find no case in which an executor has been called upon to bear the loss that has arisen because, in the bona-fide exercise of a reasonable discretion, the conclusion he came to has turned out unfortunities. Had his Landahin lived notification. nately." Had his Lordship lived until now, he would not have been able to say so much with Fir RICHARD MALIN'S decision looking him in the face. But we cannot help thinking that it would have been far better for the objects of Trusts in England, had the liberal view of the responsibilities of trustees as propounded by Lord COTTENHAM continued

VIOLENT HAILSTORM.—On Saturday after noon about 5 clock (eays the Advertiser) Wagga was visited by a hall, or rather, fee storm, which for everify we have rarely seen equalled. The storm was heralded in the usual manner by clouds of dust, after which other a dash of rain quickly followed by a shower of hill-dones and lumps of solid toe of all shapes and since. Some of these siry missiles were as large as pigeon's egge, and so fisere was the pelting of the pitiless storm, that the ground in many places was quickly covered with them and as white as a enoweritt. Some damage was done to windows and skylights, and the gardens were badly cut up, but the storm was fortunately confined to a small area, and did not extend to the vineyards at Lake Albert and elsewhere in the neighburhood where the grape-cropfeing just about ripe, so rough a visitor would probably have destroyed the hepe of the viniage. The calumnies and slanders recently circulated by inter-erted persons against the character of the Chief Secretary (says the Gesette), have determined that gentleman to put his slanderers to the proof. In the Fig. Times of the 7th isstant, appeared a letter signed "That's what Sim says," in which the most extreme and virtulent accusations were made. Mr. Burt will afford his detractors an opportunity of substantiating their statements before a jury of "good men and true," resident in Levika. He has issued a writ in the Eupreme Court against Mr. Griffiths, the proprietor of the Times.

A long report of the trial of Daniel Sinclair appears in the Gasette, which took place on the 16th February. The prissner was charged with having "unlawfully assaulted, beaten, and wourded one Masseo, a Malacola native." It will be remembered that two young men, Pulford and Thorpe, were murdered on board the cutter Cambria; the deed has been attributed to the brutal ill-usage of two Malacola natives, ince and Masseo, who were chained together by Sinclair on the deek of the Cambria is such a way, that it was thought impossible they could free themselves. Under the Admiralty Jurisdiction of the Court a decree had been pronounced for the sets of the British cutter Volunteer on a suit for wages, by a person who had served as master of her. The owner who had been arristed under a writ of no exect regne, at the suit of Messes. Golon and Brodsiac, merchants of Levuks, had suffered judgment to goby default in the Admiralty case. The British Oonest, who denice the right of the Fijian Government and Courts to exercice any jurisdiction as regards the persons and property of domiciled British subjects until there shall have been a full and formal recognition of such Government and Courts on the part of her Majesty, had protested against the whole proceeding.

(From the Wagna Wagna Advertiser.)

A MERTING of the Border Duises Committee was held on Nonday night, at the Oritarion Rotel, Wagna, to consider a communication from the Elverine Redress Committee istory formed at Albury. The following gentlemen were present: - Messrs. Shaw, Hutter, Forsyth, Hatchinson, Hawkins, Minchia, and the joint secretaries, Messrs. Fitzhardings are districted by the Riverine Redress Committee to communicate with you in reference to resolutions passed at a public meeting lately held in Albury, likes resolutions were to the effect that the co-operation of residents in all parts of Riverina should be sought by our committee, with the view of sgitating to secure some final and thorough remody for the present deplerable state of commercial relations with Violetia. With this view it was received that the sense of other parts of Riverina should be sought by our committee, with the view of sgitating to secure some final and thorough remody for the present deplerable state of commercial relations with Violetia. With this view it was received that the sense of other parts of Riverina should be taken with regard to the expediency of secking a ramedy of this kind in a severance of the present political connection with the Sydney Government, and the creation of Riverina into a reparate colony, or by her amenation to the adjoining colony of Victoria. In the latter case, the general option is that the question of sunezation must be considered, if it be considered at all, in connection with a demand for the continuance of our present land laws for a certain time-say for twenty or twenty-five years. The committee for whom we write direct that to put these issues before you in the hope that you will forth-with take means for calling a public meeting (From the Wagya Wagga Advertisor.)

Mr. Hutchinson and that sime that letter had been written it appeared from the local papers that a public meeting had been held at Albury, when it was evident that a considerable division of opinion cristed as to the question of annexation or separation, even in that district Mr. Rose, the representative of Tea-mile Creek, had stated the that his district was opposed both to annexation and separation: and Mr. Mate also said, as regarded Tarcutta, that he was certain no support would be given to either one movament or the other. Under these circumstances Mr. Doverell, case of the secretaries of the Riverine Redress Committee, had found it necessary to move the following resolution,—"That, consideration of the Border Customs question by the new Assembly, and that the proposed meeting of Rivering delegates on the 9th April be also postposed accordingly."

An annedment to the effect that the movement be proceeded with was proposed, but the sense of the meeting being clearly against it, it was withdrawn, and the original resolution was carried. He therefore thought it would be abaund to call a public meeting to co-operate in a movamen which had been abandoned, or at all ovents indefinitely becomed by Mr. Hutchinson, seconded by Mr. Fortyth, and carried,—"That, considering the determination arrived at at the recent public meeting to co-operate in a movamen which had been abandoned, or at all ovents indefinitely becomed by the result of the second by Mr. Fortyth, and carried,—"That, considering the determination arrived at at the recent public meeting to co-operate in a movamen which had been abandoned, or at all ovents indefinitely because of the second of the Border Customs which had been abandoned or at all ovents indefinitely to expected of them than so curt and cold a reply as the foregoing resolution. THE NEW ASSEMBLY.

TO THE RUITOR OF THE HERLED.

Sir.—No person who has been in the habit of listening to the debates in the Legislative Assembly or reading the occasional political correspondence in your columns under well-known signatures, can fail to identify a "Third Party," who is your issue of to-day has been considerate enough to propound a philosophy for the guidance of "new members." He does not stop short with me in stating the results of the elections according to the expressed sentiments of the candidates when before the electors, nor does he content himself, like "Another Elector," in speculating on the probable state of parties in the new House; but he sets himself up as an instructor to all, and lays down doctrines which very few I, apprehend, will be inclined to receive without examination.

Lest I should misinterpret the meaning of this

new House; but he sets himself up as an instructor to all, and lays down doctrines which very few, I apprehend, will be inclined to receive without examination.

Lest I should misinterpret the meaning of this self-constituted teacher, I will quote his own language. A "Third Party" "says he maintains "that no political promise whatever is binding upon any public man to whom it is ascribed, against, or otherwise than is consistent with the public interest. Not that political promises are things of no moment, or ought ever to be made rashly or unadvisedly, or with deliberate intention to deceive. But no constituency has, in strictness, a right to exact or enforce, or candidate to give such promises, which are in fact immoral promises, and void from the first, because, in a double sense, made without due consideration." Of course, it is assumed that the "promises" spoken cf in this passage are the "promises" openly, and voluntarily made by candidates when seeking the suffrages of the electors. To say that these promises or prefess ons of political principle ought not to be binding upon members who obtain their elections by reason of them, would, I am sure, shock the perceptions of English statesmen of all parties, and is a doctrine that ought not to be tolerated in this English community for a moment. When Mr. William Forster, for example, told the electors that "he came to Illawarra as a candidate opposed to the present Government, and that the electors had returned him as such," did he not convey to the public that, in his own view of the result, the electors had returned him because he was an opponent of the Government, and had not I and others a right to consider him "as such," Would not Mr. Forster feel aggrieved if any person vented the suspicion that, although he went to Illawarra as a candidate opposed to the present Government? Or if Mr. Forster is to beheld to his declaration of principles on the hustings—which contains the only political primises, positive or implied, which can be recognised—why should n

efficiency and purity of government could not be con-

crived.

The frank and unquestioning manner in which in the control of the contro The frank and unquestioning manner in which English statesmen recognise the declarations of candidates on the hustings, when they have been confirmed by the suffrages of the electors, was seen in the conduct of the Conservative leader on the occasion of the inst dissolution of the British Parlament. I for one at all times prefer English examples. Mr. Disraeli had just carried the Reform Act of 1868, which admitted large numbers of men to the elective franchise, and he very pardonably expected a favourable consideration at the hands of the new constituencies; but when he saw that the elections went against him, although he and all his colleagues were returned, he did not wait for the meeting of the new Parliament, but he at once considered it "consistent with the public interest" to tender his resignation to the Queen. It never occurred to him to make any calculations of the votes of members who might relieve themselves from the "promises" they had just made before the face of the nation; and I doubt if he would have attached much value to so suspicious a support.

Sydney, March 15. WASHINGTON QUARTZ MINING COMPANY. TO THE EDITOR OF THE HERALD.

SIR.—In this morning's issue I find the prospectus of the above company, containing the announcement that the Rev. W. B. Clarke had taken up a lease on Chambers' Creek. I know not by what authority the promoter thus advertises the above as a fact; but he can have no authority whatever for his attempt to persuade the public to take up shares in one mine because certain persons have chosen ground in another place. I am not aware that Messrs. Lord and Co. have taken up ground in a direct line with the Bismark or Washington companies—I think not as regards the former. The experience of mining ventures should make people very chary of following blindly in the footsteps of any one person; and the experience hitherto acquired does not justify the notion, always assumed as a fact, that because one spot in a certain line is rich in gold all places in the same line are equally rich, or that they are rich at all. The public are as much at illerty to assume that Messrs. Lord and party took up land, which was the only available spot to be had, because Messrs. Hunt, Corneille, and others had taken up land near to them, as to assume that, with a sudden divining power, the Rev. W. B. Clarke held his walking-stick up, and pointed to where untold gold was stored.

Let the companies seek to be floated on their own merits, after a promer and commertent inspection.

gold was stored.

Let the companies seek to be floated on their own merits, after a proper and competent inspection.

I have the authority for stating that the Rev. W. B. Clarke has positively declined to give any opinion on the value of any mine. It is too bad, therefore, that his name should be dragged in fin an indirect manner) to float a new mining venture.

BAND FOR THE DOMAIN.

SIR,—It is very much to be regretted that some steps are not taken to secure a weekly performance by the Volunteer Band in the Botania Gardena. It is really a reflection on the musical taste of this large city that means are not provided by public subscription to defray the necessary expense. The members of the band could not of course be expected to give their time, as most of them are employed; but I am assured they would accept a moderate recompense. The Government too might be induced to contribute towards the expense. In the hope that something will be done in the matter by the Volunteer suthorities, in conjunction with Mr. D. Callen, the bandmaster, I beg to enclose the guinea as my subscription for six months,

I remain, Sir, yours obediently.

ELECTION FOR ST. LEONARDS.

TO THE EDITOR OF THE HERALD.

SIE-During the late election for St. Leonards the Electoral Roll was found to be very defective. Much annoyance was felt in consequence of the policemen whose duty it was to make cut the list for the current year for this neighbourhood having called upon many persons and ascertained the necessary particulars, but, notwithstanding which, their cames did not appear on the Roll. This was taken by some persons to be conclusive evidence of neglect on the part of the collectors, and calculated to throw the electors off their guard.

persona to be conclusive evidence of neglect on the part of the collectors, and calculated to throw the electors off their guard.

In pursuance of a promise which I made I wrote to the Inspector-General of Police on the subject, and have received the following reply, which, in justice to the parties interested, I hope you will give publicity to.

"Police Department, Inspector-General's Office, "Bydney, 14th March, 1872.

"Six,—I have the honour to acknowledge the receipt of your letter of the 12th Instant, relative to the alleged consistion by the police to place electors' names on the roll for St. Leonards; and, in reply, I beg to state that I am informed the 1870 roll was used at the recent election, in consequence of no Revision Court having assembled to revise the lists collected by the police for 1871; hence, no doubt, the omission of the names of which complaint is made.

"I have the honour to bo, Sir,

"W. Tunks, Eq., M.P., St. Leonards."

I avail myself of this opportunity of urging on their Worthips the Revising Justices for the district of Sydney the necessity of performing the duty which will be allotted to them in a few days—to revise the list for the forthcoming year, and not, by their neglect, to disfranchise an increasing number of properly qualified electors.

From the date that last mail left for California until the news per incoming P. and O. steamer was telegraphed from Adelaide, the export markets exhibited a firm tone without much markets exhibited a firm tone without much alteration in prices. Whatever changes took place were in favour of vendors. News of a further rise in wool at the London February sales is most satisfactory to all classes, particularly so to the producers and dealers who speculated for a rise. The sales this week were dearer, though not proportionately so to the rise in the home proportionately so to the rise in the home markets. Hides have been selling at higher prices than have been obtained for years past, and are likely to remain dear owing to the increased demand for colonial manufacture. The inquiry for shipping parcels of tallow has in-creased, tonnage having become more plentiful creased, tonnage having become more plentiful in consequence of the unusually early period at which the wool season may be said to have closed. Three ships which cleared for London during this month took the following cargoes:

—Strathdon: 1913 bales wool, 63 bales cotton, 173 casks cocoanut oil, 35 casks sperm oil, 620 casks tallow, 1860 packages candlenuts, 276 bags cotton seed, 120 bags copra, 81 cases pearl shell, 52 casks butter. Highflyer: 2332 bales wool,

21 bales cotton, 963 bags wheat, 1000 cases 21 bales cotton, 963 bags wheat, 1000 cases preserved meat, 3721 ingots 202 cakes copper, 122 bags tin ore, 355 bags tallow. Strathnaver: 2295 bales wool, 6 bales sheepskins, 112 bales leather, 1379 cakes 10 ingots copper, 299 hides, 467 casks oil, 505 casks tallow, 1563 cases preserved meat, and sundries. The Brucklay Castle, Hawkesbury, and Tweed have completed the bulk of their engagements, and are expected to leave in all this month. and are expected to leave in all this month. The Agnes Rose and Christiana Thompson are the only other vessels at present on the berth. The high rates offering for coal charters to Eastern ports has reduced shipments to California. There are large orders on hand for a number of foreign markets, and some are now being fulfilled at 7s. per ton, free on board, at Newcastle. The departures for San Francisco during the past four weeks were:—The Alcatraz, with 920 tons; T. Magoun, 1473 tens; Melpomene, 1950 tons. Four others are loading. Shipments of wool to the United States have almost crased. About 250 bales go forward by toceased. About 250 bales go forward by to-morrow's steamer, together with a shipment of tallow for San Francisco. For the present, freight hence for California will be forwarded by the A. S. N. Company's steamers, to Auckland, and there transferred to the mail boats. land, and there transferred to the mail boats. It is not possible to say whether shippers from this port will have even this facility for any length of time, as it is reported that Mr. Webb has made some arrangements with the Victorian Government to make Melbourne the terminus of his line.

The import markets have been materially strengthened by the advanced rates ruling in England at date of last advices. This news has unsettled prices; and until after the mail per Nubia is delivered, holders are not disposed to fix quotations. Recent arrivals from foreign ports have not been large; those from England confined to the Agnes Rose and Christiana Thompson. There have been no arrivals from the United States, and no arrivals from the United States, and stocks of American merchandise have been reduced proportionately. The quantity in bond to day, as per Government returns, was:

—Manufactured tobacco, 180 half-tierces, 42,972 lbs.; 304 quarters, 74,769 lbs.; 1934 boxes, 224,337 lbs.; 429 cases, 83,921 lbs.; repacked, 21,692 lbs. The only specimens approaching true lode tin, the produce of the colony, reached the Exchange on the 7th instant, and were examined by a large number of persons interested in the development of our mining resources. These specimens, and a number of others, more or less rich in tin, came from the Elsmore mine, the richest being those taken from the lode at a depth of sixty feet. Sous-very handsoome exhibite of semi-transparent crystals were also amongst the collection.

Tuesday, February 27, was set apart as a special day of prayer and public thanksgiving for the restoration to health of his Royal Highness the Prince of Wales. The loyalty of the people, and their eympathy with our b-loved Queen, could not have been testified in a more marked manner. Every shop and business establishment in the city was closed; and in Learly every church Divine service was performed and special prayers offered.

The Issueovith Examiner learns that an antimony mine has been discovered between Bingers and Gineroi station, and that the ground has been lensed from the Government by parties who intend to test its value. The antimony is said to be seen in pretty large quantities on the earfnor, and the lenseholders are about to raise two tons of the stuff and have it sent to Ragland, that its value may be ascertained.

The Cinson steamer, with supplies for the overland telegraph construction party, was taken eighty nules up the Roper River, Northern Australia. It is described as being one of the finest, if not the finest, rivers in Australia, and that it is navigable at all seasons of the year for vossels drawing ten feet of water for a distance of 100 miles from the attrance. The telegraph wire has been stretched from Port Darwin to the King (a stream called after the explorer of the advance party in charge of Mr. Barton), a distance of some 220 miles, and the country is poor in the extreme, the sell being very sandy. From the head of navigation on the Roper to the nearest point of the wire is about 130 miles; and the country lying between the Roper and the line is well grassed and watered. It is considered to be very suitable for cattle, and is not likely to be flooded, as no watermarks have been seen on the trees. The gap in the line left to be completed by the contractors was about 600 miles; and out of this, 100 miles have since been poiled at the northern end by the Government parties, and about 300 miles of wire have been left at the various sectional depots. The "posting" was being proceeded with the country to be traversed. The work is built proceeded with a both ends; and the distance now about to be covered by horse express is estimated at not more than 200 miles, and will be delity diminished as the stretching of the

miles, and will be deily diminished as the stretching of the wire proceeds.

Mr. N. Selfe (of Mort's Dry Dock and Engineering Company), has patented an improved quartz and ore creating ansakine. This invention consists of a steam hammer, or stamper, actuated by a pisson within a cylinder, so constructed that a continuous pressure of steam or air overcomes the gravity or weight of the hammer, stamper, or piston, and acts with a constant force to raise them; whilst an intermittent power of steam, or compressed air or gas, acting on the upper surface of the piston, and regulated by a valve, causes the same to descend and strike a blow; by which arrangement steam only is used in proportion to the length of the blow given, no power being consumed to lift the hammer; also a valve so constructed as to work by the action of the stamp without the intervention of rods, cranks, tappets, or levers; also arrangements and combination of arrangements and combination of arrangements and combination of arrangements for cassing a revolution of the piston and hammer in either its upward or downward stroke; also an arrangement for shifting the cylinder to adjust the length of stroke, and compensate for the wearing of the "shee," or "hammer head."

PER CITY OF MELBOURNE AND NEBRASKA.

NEW SOUTH WALES.
Tue A. S. N. Company's steamer City of Melbourne arrived in Sydney on the 9th instant, from Auskland. She placed in Sydney on the 9th instant, from Auskland.

Reyal Highness the l'vince of Wales.

Dr. Wail, of Sundhurst, has been committed for tr d on a charge of manalaughter, in consequence of his treatment of a child.

Bir James M'Culloch has resigned his seat in the Assembly, and visits England by the Northumberland.

Amongst the measures in course of preparation for introduction into Parliament in the ensuing session is a bill for the regulation of brokers. The proposed measure is based upon the rules of the London Stock Exchange and the regulation setablished by the Court of Aldermen for the regulation setablished by the Court of Aldermen for the regulation of brokers in the city of London. Recent excitements in the charge market have only rendered more palpable the necessity for some much enactment.

The attention of the Government has been called to a case of crucity to a child from the lindustrial School in the family of a clergyman near Melbourne.

Our correspondent, writing under date March 9, with regard to the sund survices, asyn:—"Mr. Webb and Mr. Yegel have been plying our Ministers with proposals in relation to the desired subsidy to the Californian mail service with a pertinacity which seems to indicate that is maintenance depends on the aid to be given to it by this colony. At first there seemed to be filtle or no hope of any sgreement being arrived at, but during the last day or two a mutual understanding appears to have been come to, although the nature of the proposal which will probably be submitted to Parliament is not to be made public in the meantime. The Melbourne merchants intend inviting Mr. Webb te a public dinner on Thresday. A suggestion has been started by many influential met cantile men on the subject of the main postal route by many influential met cantile men on the subject of the main postal route by way of Galle, and which in the first blush of the thing seems feasible—mannely, that instead of renowing the contract with the P. and O. Company, the Government chould feet to pay a subsidy of so much per letter on all mish brught of t

while. Government in engineering the earth with the electric while. The Government intend proposing to Parliament the construction of at least three new lines of railway—the black line from Geelong to Camperdown, a railway found Arvant to Stawell, and shother from Me-bourse to Gipps Land.

QUEENSLAND.

Mctday, the 4th instant, was set apart by proclam thom as a day of thankagiving for the recovery of H. R. H. the Prince of Wales from his recent tilness. The Government cifices, banks, and all places of ounsiness were closed, and, with few exceptions, there was a general cossation from labour of any hind. Religious services were held in all the places of worship.

Partisment has been further prorogued until the 16th April, when it will meet for the dispatch of business.

There seems to be some probability of a fresh outbreak of gold fever in the North. Most encouraging reports are being received from the new rush at Charles Towers, near Townsville, where, smongest other good finds, one nugget has been unearthed weighing over 123 ox. From the Reberidge also the accounts are very satisfactory, the yield of a recent crushing of eighteen tons of stone from the North Star Prospectors' claim averaging 4 ox. 84 dws. to the ton. From other fields, intelligence of good prospects continue to be received.

The Minister for Works and Mines has issued a praclamation offering a reward of £1800 for the discovery of a diamend field. The notice is an follows:—"The Government have received information encouraging the belief that diamend drift exist in various parts of the colony, depocially near Warwick, Nanago, and Agate Creek, Gilbert River: It is hereby notified for general information that they have decided upon offering the above reward (£1000 sterling), subject to the sanction of Parliament, for the discovery of any diamond field or drift upon the following conditions, viz.:—The reward shall be payable to the person or party who shall first make known to the Government, showing that not less than one thousand persons are profitably engaged on the field in mining for diamonds."

The tin mines at Maryland (easy the Warvick Ezaminer and Times of Saturday last) are attracting great attention, and are

number of years."

At Gympic, the Enterprise machine crushed five times from January 24 to February 17—in all 1038 tons, which yielded 2266 oz. of gold. During the same periol the United machine had four crushings, 683 tons, which yielded 2398 oz.

The Gympie gold mines yielded during the week en ! d February 17,4876 oz. 15 dwts.

SOUTH AUSTRALIA.

There has been a Ministerial crisis during the wenth. The new Ministry were sworn in on the 4th instant. Mr. Ayers is Chief Secretary; Mr. Barrow, Treasurer; Mr. Reynolds, Minister for Crown Lands; Mr. Cavenagh, Minister for Fublic Works; and Mr. Stavenson, Attorney-General.

"The appearance in South Australian waters of one of the finest vessels belonging to the F. and O. fleet is," says the Register. February 19, "an event of no little importance. Up till yesterday nearly twelve years had clapsed since the smoke of a company's steamer had been seen in St. Vincent's Gulf. In every respect the inauguration of the Gleneig detour—for we regard yesterday's proceedings in that light—was exceedingly successful. The trip from Melbourne was accomplished in tolerably good time, and quick dispatch was given to the steamer in Holdfast Bay. The P. and O. Company may very appropriately accepting as the experiment which they have requested shall precede any definite agreement to call at Gleneig, and yield gracefully and at once to the proposals of South Australia, backed as they are by the influential support of the other colomies."

The death of the Right Rev. Dr. Shiel, Homan Catholic Blabop of Adelaide, occurred on the lat instant. The event cast quite a gloom among the circles in this colony where the Bishop of Adelaide, occurred on the lat instant. The event cast quite a gloom among the circles in this colony where the Bishop of Adelaide, occurred on the lat instant. The event cast quite a gloom among the circles in this colony where the Bishop of Adelaide, or well known, and with the religious history of which he had for many years been identified. The cause of death is reported to have been complete protration following upon a carbuncle in the neck, under which he had suffered for about two months, and which completely broke down his constitution.

Loss of THE Basgue Indus.—The barque Indus, with a cargo of coals, &c., commanded by Captain M'Call, left Newcasile on 16th February, tound for Port Chainmen (N.Z.). Sh.rtly after leaving, a violent gale set in from S.E., and the vessel commined leaking badly, the leakage having increased from the time of leaving port. The leak was ascertained to have originated in the starting of the woodends forward. All hands were kept at the pumps, and every endeavour made to keep the ship aftoat, but without avail. Sail was then made for the nearest point of the Australian coast; but the water guined so rapidly that at last she was making if inches per hour. Under these circumstances, it was decemed advisable by the commander to abandon the vessel, the water of the commander to abandon the vessel to their fruit craft, made for the land, which was reached at Bermagul. The vessel, when abandoned, had 7 feet of water in the lodd, and was left on the 17th Pebruary in latitude 33 8 8, longitude 1929 8.

SUPREME COURT.-FRIDAY, MARCH 15,

directed them correctly). The point raised was that the priseners had been wrangly convicted, insemuch as three was no evidence whatever of stealing by some other person.

Mr. Wilkinsen appeared for the Crown, and Mr. Salomens for the priseners.

Their Honoras, aithough believing that the prisoners would be entitled when the facts came to be fully stated, to their discharge, could not, as the apecial mas had been drawn, pronounce that decision. Certain necessary information had been omitted, and it would be necessary that the Judge should state the actual nature of his address to the jury. The special case was therefore sent back for amendment, the pritoners being in the menatime allowed belief to be taken before any justice of the peace; each of themselves to be bound in the sum of £20, and to give two sureties of £10 each.

Before Mr. Justice Hardenane, Mr. Justice Cherks, and Mr. Justice FAUCHT.

M'DONALD AND WIFE Y. WATSON AND WIFE—APPEAL—ECLEPIANTICAL JURIBRICTION.

The arguments in this case—an appeal against a decree in a suit for probate in which defandants had succeeded (oblining a verdict on the Jeigned issue, as to facts, and an order from the Primary Judge in accordance with such verdict)—was resumed, and lusted the remainder of the day without being concluded. It will be continued on Monday.

THE MAYOR AND OTHERS V. MOSS.

This was an application for a rehearing on the ground that detendant did not think it necessary that she should attend the Court to defend the suit on account of issolvency, and that there were good grounds for defending the action upon its merits. Counsel for plaintiffs had no objection to a rehearing if defendant undertook to file an affishift that there was a defense upon the merits, and that they rehearing was not applied for solely to enter a plea of insolvency. This was agreed to by the other side, and that they rehearing granted a rehearing in appeara

PARLIAMENTARY ELECTIONS.

PARLIAMENTARY ELECTIONS.

TO THE ELECTORS OF THE DISTRICT OF GWYDIR.

GENTLEREN,—As no candidate has come forward to solicit your suffrages, except your late member, who has systematically absented himself from the Assembly, and left the duties he undertook wholly unperformed, I beg to offer myself for election.

With respect to the question of Border duties, which caused the dissolution of the Assembly, it is to be deplored that some jarrangement was not made to prevent the axtreme measure of establishing Custom-houses on our inland fronties. That an equitable settlement of the difficulty will be made by the next Assembly, however it may be constituted, I feel convineed. And I think it is unnecessary for me to say more on this subject than that, if elected, I will always support any measure that tends to promote friendly relations with the sister colonies.

As Ministers seem disposed to make material alterations in the prosposed Land Bill, it is really impossible to give an opinion on that which may be so modified as to be entirely mother bill. But this I will say, that any measure which does not deal fairly and justiy with both those who now occupy the land as tenants, and those who wish to become proprietors of it, will not meet with my support.

I am a Frostrader in every sense of the word, and will never support any measure that would beautit one class at the expense of another.

Having been engaged in pastoral pursuits for upwards of thirty years, and having a large stake in year district, which is the home of myself and family, my interests are altogether identical with your own.

If elected, I will not shirk the responsibilities I undertake, but will sake my seat, and to the best of my ability do all I can for the good of the exlony generally, and of all parts of the district I represent.

Being a party to an action which will be tried in the Supreme Court this month, it will be impossible for me personally to solicit your votes, or to attend meetings to explain my views more fully; but, if I can possib

TO THE ELECTORS OF THE WESTERN GOLD-FIELDS.

GENTLEMEN,—The Parliament to which you did me the bonour of electing me two years ago having been dissolved, I beg to intimate my intention of again seeking your suffrages.

I shall take an early opportunity of visiting the district, and trust that the course I have pursued during the time I have been your representative will obtain for me a renewal of your confidence.

Your faithful servant,
WALTER CHURCH.

PUBLIC NOTICES. WATBE-PRIZE ESSAY.

It was officially reported, this mening, that only one dam at Botany contained water, and that the quantity was barely adequate to give five weeks supply." See SYDNEY MORNING HERALD and EMPIRE of the 9th March.]

A PRIZE of £5 5s will be given to the best cossy dealing with the following points:—
1st. Answers to the following questions, the data for which are mainly extracted from the Water Commission Blue Book.

Blue Book.

(1.) Given a river with a watershed of 240,000 acres, and an average rainfall of 49½ inches per annum; state the quantity of water that would flow down the river annually, on the suppession that one-third of the rainfall found its way into the river?

(2.) Suppose the mouth of the George's River to be closed by a water-light dam, and a reservoir thereby created of 3000 acres in extent, how much water would such a reservoir contain, assuming that there was in it, at the level of low neap-tides, an average depth of 6 feet?

(3.) Assuming the difference between low neap tide and high spring tide to be 6 feet, how much water would the aforcesid reservoir contain, at the level of high spring tides?

inforceast reservoir contain, at the level of high spring titides?

(4) Assuming that the ingress of salt water into the aforceast reservoir was permanently arrested when the water stood at the level of low neap tide, and that the reservoir were allowed to fill to the level of high spring titides by the fresh water flowing down the river; and that by means of discharge outlets the water were allowed to fall again to the level of low neap-tides, what would be the effect on the saltness of the water impounded, and how often would this process have to be repeated before the water was rendered fresh enough for domestic purposes?

purposes? (5.) Suppose that, by means of a dam, the level of the water, in the reservoir, were raised 6 feet above the level of high spring tides, what quantity of water would the aforesaid reservoir then contain; and how often, under these conditions, would the surface water have to run off, as before explained, until the stored water was fit for domestic mas ?

before explained, until the stored water was fit for domestives?

(d.) Assuming that an adequate quantity of water for the supply of the city of Sydney could be conducted, free of cost, to a point, within 5 miles of the Botany Water-works, and of 10 miles of the reservoir, at Surry Hills, state the relative advantages and disadvantages, of pumping water to the level of the reservoir, or delivering water, at the same level from another source, by means of an artificial aqueduct, 63 miles in length—such, for instance, as that proposed by the Water Commission. And further, state the relative advantages and disadvantages of pumping, at once, from the soa level to the height of the Paddington Reservoir, or that of the proposed reservoir at Waverley; and those attendant on a plan which would deliver water, by gravitation, by the Commissioner's route, at the level of Surry Hills, and which would require it to be pumped to the levels of Paddington and Waverley.

PARRAMATTA PARK.

W. BOWDEN is favoured with instructions to sell by auction, at the Land Sale Rooms, 164, Pitt-street, on THURSDAY, the 21st day of March, at 11 o'clock, for half-past 11 prompt.

A very veluable orchard, comprising 2 blocks of land centaining 41 acres I rood, being lots 125 and 126 on the Government plan of the embidision of the Paramatta Domain, separated by a main road from MAYFIRLD SSTATE, the property of George Oakes, Esq. The frontage to the road is about 34 chains, and is securely fenned.

About 30 acres are planted with orange, lemon, and apple trees. Of the latter there are about 400, and of the orange and Lisbon lemens about 1600, most of them full-grown trees, and planted 24 feet spart.

of them full-grown trees, and planted 24 feet apart.

The situation is salubrious and really beautiful, so elevated as to command views of the town of Parramatta, the suburbs, and surrounding country for miles, extending eastward to the city of Sydney, and westward to the mountain ranges. It must be seen to be duly appreciated.

The Railway Station is so near that fruit taken from the estate may be conveyed to Sydney by a little after 9 o'clock the same morning, at a low rate, and in time condition.

The gardener's cottage contains four rooms, is weather-boarded, and covered with galvanized from. Other erections, for horses and cattle, will also be found.

Some of the fortunate gold-diggers, or others looking for a permanent investment of money, and who may be accustomed to farming or horticultural pursuits, would find this estate worthy their attention, and under personal inspection to yield them an immediate return for their capital, increasing in amount every year.

to yield them an immediate return for their capital, in-creasing in amount every year.

The reason for placing the property in the market is that the present proprietor cannot give his attention to it, and is unwilling to place it in the hands of a tenant.

A plan of the property is now on view at the office of the aucticaser, who will give any further information that may be required, and authority to inspect the property prior to the sale.

The IMPROVEMENTS include a first-class weatherboard house of 10 rooms, kitchen, store, and out-offices, 3
men's huts, new woolshed, all requisite yards, horse paddock, &c.; flower and vegetable gardens.

On the whole, this forms one of the most desirable investments for anyone of limited means, being close to a
railway station, and on the far-famed Darling Downs, and
has everything requisite to render it a comfortable home, fine
the midst of a pleasant, healthful, and profitable occupation.

Allotments fronting Mount Vernon-street.

The rapidity with which the whole of the allotments already leased have been built upon clearly shows the great value of property in this locality, and also that the system of 99 years leases, and the great dvantages arising therefrom, are being better understood and acted upon. The seaure is almost equal to a freshold, while it canables the purchaser at a small annual rental to score the land, and expend his capital upon improvements which will at once yield him A PROPITABLE RETURN FOR HIS MONEY.

Men of limited capital or small means would do well to consider the very great inducements which a lease for so long a period presents to them in particular. With nearly all the advantages of a freshold they are enabled to acquire A REALLY VALUABLE PROPERTY by payment of a trifling yearly rental.

and CROSSBASKET.

These blocks adjoin each other, and comprise an area of 164 SQUARE MILES
of choice downs and undulating country, richly clothed with fattening grasses, and abundantly supplied with herbage of the very best descriptions. The water supply is ample for NEAELY DOUBLE THE NUMBER OF SHEEP in any ordinary season; and, by a small outlay, a permanent supply might be obtained which would render the station independent in times of drought.

The PADDOCK accommodation is large, being enclosed by about 40 miles of five-wire fencing, and 14 miles of brush, giving a secured area of about 30.000 ACRES OF PADDOCKS.

The HOMESTEAD and other buildings are sufficient for working the run with comfort and economy; there is also a capital WOOL SHED, equal to the requirements of the Station.

MANTUAN DOWNS is situated within 60 miles of the township of SPRINGSURE, and is about 250 miles from ROCKHAMPTON.

With this valuable property will be sold the following stock, viz.:

CATTLE.—180, more or less, a mixed herd, of good quality. The attention of capitalists is specially directed to the sale of the above property, as it is now but seldom that a station of such importance is brought into the market for positive sale under similar circumstances. The necessity of closing a parinerally account (from the effluxion of time) is the sole cause of this property being brought to the hammer; and as many circumstances point to a very decided increase of value quickly taking place in all station investments, the opportunity afforded by the present sale should not be overlooked.

The terms of sale will presently be published. All other information concerning the property can be obtained upon application to Messra. M'DONALD, SMITH, and CO., Hunter-street; or to the Auctioneers, Pitt-street.

THE PATENT SLIP,
DABLING HARBOUR, SUSSEX-STREET,
together with seasons and the contractions. together with steam-engine, cradle, and apparatus complete, in full trade and in first-rate order, capable of taking up vessels up to 600 tons burthen, and now yielding a return fully equal to £1000 ppr annum.

The property has a frontage of 70 feet to Sussax-street, with considerable depth extending to the harbour, to which it has also a large frontage, with right to reclaim and extend, and with good entrance from the foot of Kingstreet.

extend, and with good entrance from the foot of Kingstreet.

On the Sussex-street frontage are four 2-stary recentlyerected PRODUCE STORES, with extensive shed basemeat on a level with the wharf. These stores are at present
let, without any connection, or interfering in any way, with
the working of the slip and wharf.
Independent of its value as a patent slip, the property
occupies the most value be positize on the harbour for a
OOMMERCIAL WHARF, which would command an extensive business in connection with the coasting and
intercolonial trade.

Further particulars in a future advertisement. In the
meantime, the Silp, which is in full trade, can be inspected
on application to the superintendent, Mr. N. Johnston.

Plan is now in preparation, showing the extent of the land, also the right to reclaim and extend, purchased from the Government.
